Introduction

Thank you for purchasing *101 Jeep Performance Projects*. I look forward to exploring each project with you. Ever since I can remember I have always been fascinated by the Jeep brand and the mystique that it possesses within the automotive community. From helping our G.I.s win World War II to traversing a 22-mile stretch of a trail in the High Sierras known as the Rubicon, Jeeps have always been at the forefront of whatever it is that they are doing. To help keep them one step ahead, this book has been created to familiarize you with the wide variety of performance projects available for this namesake.

One of this book's primary objectives is to provide you with a sampling of the tremendous amount of aftermarket products that are available for your Jeep that will increase the performance of your rig, both on and off the road. I personally chose the products featured for each project, based on their quality, technical attributes, and durability. Each project has been designed to provide a brief overview of the product and the reason for its necessity, followed by a step-by-step installation of the product so that you may see how they are installed, what tools are required to complete the task, and the level of difficulty involved.

While many of you will utilize this book as a reference or resource guide to whatever project you are working on, it should not be used as a replacement to mechanical experience. Some projects can be accomplished at home, in your garage or on your driveway, while some others will require a shop and highly skilled technicians; engine conversions and some drivetrain modifications come to mind. I encourage you to find a reputable off-road shop or fabricator, well versed in the Jeep brands, with whom you can build a

relationship. Whether you do your own work or you have them do it for you, at least you will have added one additional resource to your tool belt. Much like any other motorsport, off-road driving and Jeep building require the same level of sharing, discussion, and combined expertise as any highly successful race team. Remember, no one can do it alone and have true success.

With this said, I hope you enjoy the book, I thank you for your interest in it, and hopefully I'll be seeing you out on the trails!
