Multivariable Calculus (Paper) By Jon Rogawski

The multivariable version of Rogawski's new text presents calculus with solid mathematical precision but with an everyday sensibility that puts the main concepts in clear terms. It is rigorous without being inaccessible and clear without being too informal--it has the perfect balance for instructors and their students.

Editorial Review

About the Author

About Jon Rogawski

Jon Rogawski received his undergraduate degree (and simultaneously a master's degree in mathematics) at Yale, and a Ph.D. in mathematics from Princeton University, where he studied under Robert Langlands. Prior to joining the Department of Mathematics at UCLA, where he is currently Full Professor, he held teaching positions at Yale and the University of Chicago, and research positions at the Institute for Advanced Study and University of Bonn.

Jon's areas of interest are number theory, automorphic forms, and harmonic analysis on semisimple groups. He has published numerous research articles in leading mathematical journals, including a research monograph entitled "Automorphic Representations of Unitary Groups in Three Variables" (Princeton University Press). He is the recipient of a Sloan Fellowship and an editor of The Pacific Journal of Mathematics.

Jon and his wife Julie, a physician in family practice, have four children. They run a busy household and, whenever possible, enjoy family vacations in the mountains of California. Jon is a passionate classical music lover and plays the violin and classical guitar.

Users Review

From reader reviews:

Harold Sparkman:

The feeling that you get from Multivariable Calculus (Paper) will be the more deep you excavating the information that hide in the words the more you get serious about reading it. It does not mean that this book is hard to understand but Multivariable Calculus (Paper) giving you enjoyment feeling of reading. The author conveys their point in particular way that can be understood simply by anyone who read this because the author of this e-book is well-known enough. This specific book also makes your current vocabulary increase well. Therefore it is easy to understand then can go together with you, both in printed or e-book style are available. We highly recommend you for having this Multivariable Calculus (Paper) instantly.

Gene Taylor:

Reading a reserve can be one of a lot of activity that everyone in the world really likes. Do you like reading book consequently. There are a lot of reasons why people fantastic. First reading a e-book will give you a lot of new info. When you read a reserve you will get new information due to the fact book is one of a number of ways to share the information or their idea. Second, looking at a book will make you more imaginative. When you examining a book especially fictional works book the author will bring that you imagine the story how the personas do it anything. Third, you may share your knowledge to other folks. When you read this Multivariable Calculus (Paper), it is possible to tells your family, friends as well as soon about yours book. Your knowledge can inspire average, make them reading a reserve.

John Davis:

As a student exactly feel bored to be able to reading. If their teacher expected them to go to the library in order to make summary for some e-book, they are complained. Just little students that has reading's internal or real their hobby. They just do what the educator want, like asked to the library. They go to generally there but nothing reading significantly. Any students feel that examining is not important, boring along with can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this Multivariable Calculus (Paper) can make you experience more interested to read.

Rebbeca Farley:

Reading a book make you to get more knowledge as a result. You can take knowledge and information from the book. Book is prepared or printed or illustrated from each source which filled update of news. In this particular modern era like at this point, many ways to get information are available for you actually. From media social such as newspaper, magazines, science guide, encyclopedia, reference book, book and comic. You can add your understanding by that book. Ready to spend your spare time to open your book? Or just trying to find the Multivariable Calculus (Paper) when you needed it?
