Handbook of Chemoinformatics Algorithms (Chapman & Hall/CRC Mathematical and Computational Biology) By Jean-Loup Faulon, Andreas Bender

Unlike in the related area of bioinformatics, few books currently exist that document the techniques, tools, and algorithms of chemoinformatics. Bringing together worldwide experts in the field, the **Handbook of Chemoinformatics Algorithms** provides an overview of the most common chemoinformatics algorithms in a single source.

After a historical perspective of the applications of algorithms and graph theory to chemical problems, the book presents algorithms for two-dimensional chemical structures and three-dimensional representations of molecules. It then focuses on molecular descriptors, virtual screening methods, and quantitative structure–activity relationship (QSAR) models, before introducing algorithms to enumerate and sample chemical structures. The book also covers computer-aided molecular design, reaction network generation, and open source software and database technologies. The remaining chapters describe techniques developed in the context of bioinformatics and computational biology and their potential applications to chemical problems.

This handbook presents a selection of algorithms relevant in practice, making the book useful to those working in the field. It offers an up-to-date account of many algorithmic aspects of chemoinformatics.

Editorial Review

About the Author

Jean-Loup Faulon is a professor in the Department of Biology at the University of Evry in France.

Andreas Bender is an assistant professor in the Leiden/Amsterdam Center for Drug Research (LACDR) at Leiden University in the Netherlands.

Users Review

From reader reviews:

Arlene Oliver:

What do you think of book? It is just for students because they're still students or it for all people in the world, what best subject for that? Just simply you can be answered for that problem above. Every person has various personality and hobby per other. Don't to be forced someone or something that they don't want do that. You must know how great and also important the book Handbook of Chemoinformatics Algorithms (Chapman & Hall/CRC Mathematical and Computational Biology). All type of book can you see on many solutions. You can look for the internet sources or other social media.

Angel Sherrill:

As people who live in typically the modest era should be change about what going on or information even knowledge to make them keep up with the era that is always change and make progress. Some of you maybe will certainly update themselves by looking at books. It is a good choice to suit your needs but the problems coming to a person is you don't know which one you should start with. This Handbook of Chemoinformatics Algorithms (Chapman & Hall/CRC Mathematical and Computational Biology) is our recommendation to make you keep up with the world. Why, because this book serves what you want and wish in this era.

Clifford Caldwell:

Reading can called mind hangout, why? Because if you are reading a book especially book entitled Handbook of Chemoinformatics Algorithms (Chapman & Hall/CRC Mathematical and Computational Biology) your mind will drift away trough every dimension, wandering in every single aspect that maybe not known for but surely will become your mind friends. Imaging just about every word written in a e-book then become one application form conclusion and explanation that maybe you never get before. The Handbook of Chemoinformatics Algorithms (Chapman & Hall/CRC Mathematical and Computational Biology) giving you another experience more than blown away your brain but also giving you useful details for your better life in this era. So now let us show you the relaxing pattern this is your body and mind are going to be pleased when you are finished studying it, like winning a game. Do you want to try this extraordinary investing spare time activity?

Adrienne Helms:

Your reading 6th sense will not betray you, why because this Handbook of Chemoinformatics Algorithms (Chapman & Hall/CRC Mathematical and Computational Biology) e-book written by well-known writer we are excited for well how to make book that can be understand by anyone who read the book. Written in good manner for you, dripping every ideas and composing skill only for eliminate your current hunger then you still question Handbook of Chemoinformatics Algorithms (Chapman & Hall/CRC Mathematical and Computational Biology) as good book not just by the cover but also by the content. This is one reserve that can break don't assess book by its protect, so do you still needing an additional sixth sense to pick this kind of!? Oh come on your examining sixth sense already alerted you so why you have to listening to one more sixth sense.
