Primary Perception: Biocommunication with Plants, Living Foods, and Human Cells By Cleve Backster

This is the only book by Cleve Backster himself, describing 36 years of research in biocommunication, observed electrical responses in plant life and other living organisms. All life forms have the capability of responding to one another, from plants and bacteria to foods and animal cells. Most amazing is his work with human leukocytes. These discoveries have opened up a new paradigm in science, ecology and healing.

Users Review

From reader reviews:

Brian Andres:

In this 21st hundred years, people become competitive in most way. By being competitive right now, people have do something to make all of them survives, being in the middle of typically the crowded place and notice by means of surrounding. One thing that often many people have underestimated that for a while is reading. That's why, by reading a guide your ability to survive improve then having chance to stand up than other is high. For you personally who want to start reading some sort of book, we give you this Primary Perception: Biocommunication with Plants, Living Foods, and Human Cells book as beginning and daily reading guide. Why, because this book is greater than just a book.

Freddie Hoops:

Playing with family inside a park, coming to see the water world or hanging out with friends is thing that usually you could have done when you have spare time, subsequently why you don't try thing that really opposite from that. A single activity that make you not feeling tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love Primary Perception: Biocommunication with Plants, Living Foods, and Human Cells, you can enjoy both. It is fine combination right, you still desire to miss it? What kind of hangout type is it? Oh can occur its mind hangout fellas. What? Still don't get it, oh come on its called reading friends.

David Musick:

Many people spending their time period by playing outside along with friends, fun activity using family or just watching TV 24 hours a day. You can have new activity to spend your whole day by studying a book. Ugh, you think reading a book can really hard because you have to bring the book everywhere? It okay you can have the e-book, delivering everywhere you want in your Smartphone. Like Primary Perception: Biocommunication with Plants, Living Foods, and Human Cells which is getting the e-book version. So , why not try out this book? Let's observe.

Scott Burnett:

Reading a reserve make you to get more knowledge as a result. You can take knowledge and information from the book. Book is prepared or printed or created from each source that will filled update of news. Within this modern era like right now, many ways to get information are available for you actually. From media social including newspaper, magazines, science guide, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Ready to spend your spare time to open your book? Or just seeking the Primary Perception: Biocommunication with Plants, Living Foods, and Human Cells when you required it?
