Psychology By Daniel L. Schacter, Daniel T. Gilbert, Daniel M. Wegner, Matthew K. Nock

Students rarely look at a psychology textbook after leaving college, but they will continue to encounter psychology throughout their lives. With that in mind, renowned authors and researchers Schacter, Gilbert, Wegner, and now Matthew Nock introduce students to today's research with a focus on the critical thinking skills that will stay with them beyond the course term. Quirky examples of thinking gone awry, and scenarios based on common psychological misconceptions are just some of the tools the authors use to get students to question what they think they know about psychological science.

Editorial Review

About the Author

Daniel Schacter is William R. Kenan, Jr. Professor of Psychology at Harvard University. Schacter received his BA from the University of North Carolina at Chapel Hill. He subsequently developed a keen interest in amnesic disorders associated with various kinds of brain damage. He continued his research and education at the University of Toronto, where he received his PhD in 1981. He taught on the faculty at Toronto for the next six years before joining the psychology department at the University of Arizona in 1987. In 1991, he joined the faculty at Harvard University. His research explores the relation between conscious and unconscious forms of memory and the nature of distortions and errors in remembering. Many of Schacter's studies are summarized in his 1996 book, *Searching for Memory: The Brain, The Mind, and The Past*, and his 2001 book, *The Seven Sins of Memory: How the Mind Forgets and Remembers*, both winners of the APA's William James Book Award.

Daniel Gilbert is Harvard College Professor of Psychology at Harvard University. After attending the Community College of Denver and completing his BA from the University of Colorado, Denver, he went on to earn his PhD from Princeton University. From 1985-1996, he taught on the faculty of the University of Texas, Austin, during which time he received the American Psychological Association's Distinguished Scientific Award for an Early Career Contribution to Psychology. In 1996, he joined the faculty of Harvard University. Gilbert has won numerous awards including the Phi Beta Kappa Teaching Prize and a Guggenheim Fellowship. His research on affective forecasting is an attempt to understand how and how well people predict their emotional reactions to future events. He is the author of the national bestseller *Stumbling on Happiness*.

Daniel Wegner is Professor of Psychology at Harvard University. He received his BS in 1970 and PhD in 1974, both from Michigan State University. He began his teaching career at Trinity University in San Antonio, TX, before his appointments at the University of Virginia in 1990 and Harvard University in 2000. He is Fellow of the American Association for the Advancement of Science and former associate editor of *Psychological Review*. His research focuses on thought suppression and mental control, social memory in relationships and groups, and the experience of conscious will. His seminal work in thought suppression and consciousness served as the basis of two trade titles, *White Bears and Other Unwanted Thoughts* and *The Illusion of Conscious Will*, both of which were named Choice Outstanding Academic Books.

Matthew K. Nock is professor of psychology and director of the Laboratory for Clinical and Developmental Research at Harvard University. He received his BA from Boston University and his PhD in psychology from Yale University in 2003 and completed his clinical internship at Bellevue Hospital and the New York University Child Study Center. His research is aimed at advancing the understanding of why people behave in ways that are harmful to themselves, with an emphasis on suicide and other forms of self-harm. His research is multidisciplinary in nature and uses a range of methodological approaches to understand better how these behaviors develop, how to predict them, and how to prevent their occurrence. His work has been recognized through the receipt of four early career awards from the American Psychological Association, the Association for Behavioral and Cognitive Therapies, and the American Association of Suicidology; in 2011 he was named a MacArthur Fellow. In addition to conducting research, he has been a consultant and scientific advisor to the National Institutes of Health, the World Health Organization's World Mental Health Survey Initiative, the American Psychological Association, and the American Psychiatric Association DSM 5 Childhood and Adolescent Disorder Work Group. At Harvard, he has received several teaching awards including the Roslyn Abramson Teaching Award and the Petra Shattuck Prize. In January 2014, he will join Daniel Schacter, Daniel Gilbert, and Daniel Wegner as a co-author of *Psychology*, Third Edition"

Users Review

From reader reviews:

Ronald Fowler:

Have you spare time for just a day? What do you do when you have a lot more or little spare time? Yes, you can choose the suitable activity regarding spend your time. Any person spent all their spare time to take a walk, shopping, or went to the actual Mall. How about open or read a book allowed Psychology? Maybe it is being best activity for you. You know beside you can spend your time with the favorite's book, you can more intelligent than before. Do you agree with the opinion or you have some other opinion?

Maria Gray:

People live in this new morning of lifestyle always make an effort to and must have the spare time or they will get large amount of stress from both way of life and work. So , when we ask do people have free time, we will say absolutely without a doubt. People is human not really a robot. Then we inquire again, what kind of activity are there when the spare time coming to anyone of course your answer can unlimited right. Then ever try this one, reading books. It can be your alternative throughout spending your spare time, often the book you have read is actually Psychology.

Dwight McBride:

Playing with family in a park, coming to see the coastal world or hanging out with buddies is thing that usually you might have done when you have spare time, and then why you don't try thing that really opposite from that. One particular activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Psychology, you are able to enjoy both. It is great combination right, you still would like to miss it? What kind of hangout type is it? Oh can occur its mind hangout men. What? Still don't understand it, oh come on its named reading friends.

Melissa Broussard:

You can find this Psychology by look at the bookstore or Mall. Simply viewing or reviewing it could to be your solve trouble if you get difficulties on your knowledge. Kinds of this e-book are various. Not only by written or printed but additionally can you enjoy this book by e-book. In the modern era just like now, you just looking from your mobile phone and searching what your problem. Right now, choose your personal ways to get more information about your publication. It is most important to arrange you to ultimately make your knowledge are still revise. Let's try to choose appropriate ways for you.
