Oleochemical Manufacture and Applications (Sheffield Chemistry and Technology of Oils and Fats) From Blackwell

Oleochemical Manufacture and Applications presents an overview of oleochemicals at the research and professional levels, with an emphasis on industrial production and applications. Approximately half of the chapters consider general matters, while the other half deal with applications. Authors are drawn from industrial and academic laboratories around the world. The book is an invaluable reference for chemists and technologists working on the production and use of oleochemicals, analytical chemists, quality assurance personnel, and lipid chemists in academic research laboratories.

Editorial Review

Review

"fills a need for scientists and marketers that are new to the oleochemical industry, either right from school or changing industries. The work is a useful introduction to the industry for laboratory chemists, technical service representatives, product managers, and formulators. The chapter on analytical techniques will be a well-used reference. Although the book is a collection of contributions from various authors, it flows well and is an interesting and easy read for the technically trained. "The book covers a centuries old and traditional industry. Yet the editors make it relevant to the modern world and the future in the treatment of biofuels, new industrial oils, and oleochemicals and the environment. This ushers us into a new era and challenges the reader to think of the future satisfaction of needs by developing new applications, manufacturing techniques, and chemistries, while considering environmental impact, product stewardship, and sustainability. I found the book interesting, useful as a reference book and easy to read." - Robert J. Drennan, Vitusa Products Inc., in AOCS Press

From the Back Cover

This volume is concerned with the use of over 16 million tonnes of oils and fats by the oleochemical industry worldwide. It provides an overview of oleochemicals at research and professional level, with an emphasis on their industrial production and applications. Approximately half of the chapters consider matters of relevance throughout the oleochemical industry, while the remainder deal with applications. Authors are drawn from industrial and academic laboratories around the world.

About the Author

Kim Hamilton is a senior software engineer at a major aerospace corporation, where she has designed and implemented a variety of systems, including web applications and distributed systems. Kim has a Master's in Applied Math and Computer Science from Cornell University.

Users Review

From reader reviews:

Verna Smith:

Nowadays reading books become more and more than want or need but also turn into a life style. This reading practice give you lot of advantages. The benefits you got of course the knowledge the actual information inside the book this improve your knowledge and information. The data you get based on what kind of e-book you read, if you want attract knowledge just go with training books but if you want really feel happy read one along with theme for entertaining such as comic or novel. The actual Oleochemical Manufacture and Applications (Sheffield Chemistry and Technology of Oils and Fats) is kind of e-book which is giving the reader capricious experience.

Louie Thompson:

This Oleochemical Manufacture and Applications (Sheffield Chemistry and Technology of Oils and Fats) are

reliable for you who want to be considered a successful person, why. The main reason of this Oleochemical Manufacture and Applications (Sheffield Chemistry and Technology of Oils and Fats) can be one of several great books you must have is actually giving you more than just simple reading through food but feed you with information that perhaps will shock your before knowledge. This book is actually handy, you can bring it everywhere you go and whenever your conditions both in e-book and printed kinds. Beside that this Oleochemical Manufacture and Applications (Sheffield Chemistry and Technology of Oils and Fats) giving you an enormous of experience such as rich vocabulary, giving you test of critical thinking that we know it useful in your day pastime. So , let's have it and enjoy reading.

Marylou Standley:

Hey guys, do you wishes to finds a new book to see? May be the book with the subject Oleochemical Manufacture and Applications (Sheffield Chemistry and Technology of Oils and Fats) suitable to you? Typically the book was written by renowned writer in this era. The actual book untitled Oleochemical Manufacture and Applications (Sheffield Chemistry and Technology of Oils and Fats)is the main of several books that will everyone read now. This specific book was inspired many people in the world. When you read this publication you will enter the new age that you ever know just before. The author explained their plan in the simple way, so all of people can easily to know the core of this book. This book will give you a great deal of information about this world now. To help you to see the represented of the world in this book.

Bessie Starns:

Oleochemical Manufacture and Applications (Sheffield Chemistry and Technology of Oils and Fats) can be one of your beginner books that are good idea. All of us recommend that straight away because this publication has good vocabulary that will increase your knowledge in vocabulary, easy to understand, bit entertaining however delivering the information. The copy writer giving his/her effort to place every word into satisfaction arrangement in writing Oleochemical Manufacture and Applications (Sheffield Chemistry and Technology of Oils and Fats) nevertheless doesn't forget the main place, giving the reader the hottest as well as based confirm resource details that maybe you can be considered one of it. This great information could drawn you into brand new stage of crucial considering.
