Editorial Review

Review

"Anyone interested in assessment can learn from this book" -**Daniel McCabe, assistant principal and blogger**

"Hacking Assessment is a must read for any educator considering the possibilities of throwing out the grades and hacking the way we have always assessed our learners" -**Tony Sinanis, author and former principal of the year**

"The beauty of the book is that it is not an empty argument against grades-but rather filled with valuable alternatives that are practical and will help to refocus the classroom on what matters most"- **Adam Bellow, Founder of Edu Clipper, and Edcamp Foundation Board Member**

"In this book Starr Sackstein challenges the traditional paradigm of grading with lots of practical advice about how to provide and utilize descriptive feedback instead of relying on the symbolic and very limiting representation provided by grades. The book, however, is much more than that because it is an extremely valuable primer about how to make students reflective learners who take charge of their own learning." - **Ken O'Connor, author and assessment expert**

"Grades are a crude and ineffective tool to convey what matters most in a student's development. Hacking Assessment, Starr Sackstein's report of her courageous, thoughtful and illuminating effort to design a better approach to assessment is a terrific read for educators who worry about the values that a single letter or number grade can convey." --Angela Maiers, Author/International speaker "Ms. Sackstein has created an excellent resource for changing the traditional mindset and moving to a collaborative, reflective model of assessment. I recommend this book to teachers, administrators and educational stakeholders who may be searching for a better way." --Michael Curran, Education Professor Rider University
