Models & Methods for Project Selection: Concepts from Management Science, Finance and Information Technology (International Series in Operations Research & Management Science) By Samuel B. Graves, Jeffrey L. Ringuest

Models & Methods for Project Selection systematically examines in this book treatment the latest work in the field of project selection modeling. The models presented are drawn from mathematical programming, decision theory, and finance. These models are examined in two categorical streams: the management science stream and the financial model stream. The book describes the assumptions and limitations of each model and provides appropriate solution methodologies. Its organization follows three main themes:

***Criteria for Choice:** Chapters 1-3 investigate the effect of the choice of optimization criteria on the results of the portfolio optimization problem.

***Risk and Uncertainty:** Chapters 4-7 deal with uncertainty in the project selection problem.

***Non-Linearity and Interdependence:** These chapters deal with problems of non-linearity and interdependence as they arise in the project selection problem. Chapters 8, 9 and 10 present solution methodologies, which can be used to solve these most general project selection models.

Editorial Review

Review

From the reviews:

"This book presents the latest developments in the area of project selection management. ... Each chapter contains (at the end) numerous references where the interested reader can find further information on the topics covered, and some chapters are highlighted with sample SAS computer code." (Efstratios Rappos, Zentralblatt MATH, Vol. 1103 (5), 2007)

Users Review

From reader reviews:

Kenneth Hand:

Have you spare time to get a day? What do you do when you have far more or little spare time? Sure, you can choose the suitable activity to get spend your time. Any person spent their very own spare time to take a wander, shopping, or went to the particular Mall. How about open or read a book eligible Models & Methods for Project Selection: Concepts from Management Science, Finance and Information Technology (International Series in Operations Research & Management Science)? Maybe it is being best activity for you. You know beside you can spend your time with the favorite's book, you can cleverer than before. Do you agree with it has the opinion or you have some other opinion?

Thomas Jones:

Reading a book tends to be new life style within this era globalization. With studying you can get a lot of information which will give you benefit in your life. Together with book everyone in this world can easily share their idea. Ebooks can also inspire a lot of people. A great deal of author can inspire their own reader with their story as well as their experience. Not only situation that share in the books. But also they write about the data about something that you need case in point. How to get the good score toefl, or how to teach your kids, there are many kinds of book which exist now. The authors in this world always try to improve their skill in writing, they also doing some research before they write to their book. One of them is this Models & Methods for Project Selection: Concepts from Management Science, Finance and Information Technology (International Series in Operations Research & Management Science).

James Ritchey:

This Models & Methods for Project Selection: Concepts from Management Science, Finance and Information Technology (International Series in Operations Research & Management Science) is great book

for you because the content which is full of information for you who else always deal with world and have to make decision every minute. This kind of book reveal it data accurately using great coordinate word or we can say no rambling sentences in it. So if you are read it hurriedly you can have whole data in it. Doesn't mean it only will give you straight forward sentences but tough core information with lovely delivering sentences. Having Models & Methods for Project Selection: Concepts from Management Science, Finance and Information Technology (International Series in Operations Research & Management Science) in your hand like getting the world in your arm, information in it is not ridiculous a single. We can say that no book that offer you world with ten or fifteen second right but this publication already do that. So , this is good reading book. Hey Mr. and Mrs. busy do you still doubt in which?

Russell Fielder:

What is your hobby? Have you heard this question when you got learners? We believe that that concern was given by teacher to the students. Many kinds of hobby, All people has different hobby. So you know that little person like reading or as reading become their hobby. You need to understand that reading is very important along with book as to be the matter. Book is important thing to increase you knowledge, except your own personal teacher or lecturer. You will find good news or update regarding something by book. Numerous books that can you choose to use be your object. One of them is Models & Methods for Project Selection: Concepts from Management Science, Finance and Information Technology (International Series in Operations Research & Management Science).
