Building a Home Security System with Raspberry Pi By Matthew Poole

Build your own sophisticated modular home security system using the popular Raspberry Pi board

About This Book

- This book guides you through building a complete home security system with Raspberry Pi and helps you remotely access it from a mobile device over the Internet
- It covers the fundamentals of interfacing sensors and cameras with the Raspberry Pi so that you can connect it to the outside world
- It follows a modular approach so that you can choose the modules and features you want for your customized home security system

Who This Book Is For

This book is for anyone who is interested in building a modular home security system from scratch using a Raspberry Pi board, basic electronics, sensors, and simple scripts. This book is ideal for enthusiastic novice programmers, electronics hobbyists, and engineering professionals. It would be great if you have some basic soldering skills in order to build some of the interface modules.

What You Will Learn

- Understand the concepts behind alarm systems and intrusion detection devices
- Connect sensors and devices to the on-board digital GPIO ports safely
- Monitor and control connected devices easily using Bash shell scripting
- Build an I/O port expander using the I2C bus and connect sensors and anti-tamper circuits
- Capture and store images using motion detectors and cameras
- Access and manage your system remotely from your mobile phone
- Receive intrusion alerts and images through your e-mail
- Build a sophisticated multi-zone alarm system

In Detail

The Raspberry Pi is a powerful low-cost credit-card-sized computer, which lends itself perfectly as the controller for a sophisticated home security system. Using the on-board interfaces available, the Raspberry Pi can be expanded to allow the connection of a virtually infinite number of security sensors and devices. The Raspberry Pi has the processing power and interfaces available to build a sophisticated home security system but at a fraction of the cost of commercially available systems.

Building a Home Security System with Raspberry Pi starts off by showing you the Raspberry Pi and how to set up the Linux-based operating system. It then guides you through connecting switch sensors and LEDs to the native GPIO connector safely, and how to access them using simple Bash scripts. As you dive further in, you'll learn how to build an input/output expansion board using the I2C interface and power supply, allowing the connection of the large number of sensors needed for a typical home security setup.

In the later chapters of the book, we'll look at more sophisticated topics such as adding cameras, remotely accessing the system using your mobile phone, receiving intrusion alerts and images by e-mail, and more.

By the end of the book, you will be well-versed with the use of Raspberry Pi to power a home-based security system that sends message alerts whenever it is triggered and will be able to build a truly sophisticated and modular home security system. You will also gain a good understanding of Raspberry Pi's ecosystem and be able to write the functions required for a security system.

Style and approach

This easy-to-follow guide comprises a series of projects, where every chapter introduces a new concept and at the end of the book, all these concepts are brought together to create an entire home security system. This book features clear diagrams and code every step of the way.

Editorial Review

About the Author

Matthew Poole

Matthew Poole is a systems engineer based near Southampton on the south coast of England with over 20 years of industry experience. After graduating in electronics and communications engineering, he went on to train as and to become an air traffic engineer for the UK Civil Aviation Authority, working on microprocessor-based control and communications systems. Later, he became a software architect and mobile technology specialist, and worked for several consultancies and global organizations. He is now a partner at UK Mobile Media, a boutique systems consultancy focused on designing Bluetooth and other wireless systems, taking ideas from concept to prototype. He is also the director of technology for Mobile Onboard, a leading UK-based transport technology company that specializes in on-bus connectivity and mobile ticketing.

Users Review

From reader reviews:

Karla Whisenant:

The book Building a Home Security System with Raspberry Pi gives you the sense of being enjoy for your spare time. You may use to make your capable more increase. Book can to be your best friend when you getting anxiety or having big problem using your subject. If you can make looking at a book Building a Home Security System with Raspberry Pi to get your habit, you can get much more advantages, like add your capable, increase your knowledge about a few or all subjects. You could know everything if you like wide open and read a reserve Building a Home Security System with Raspberry Pi. Kinds of book are several. It means that, science reserve or encyclopedia or other individuals. So , how do you think about this publication?

Donovan Pena:

Reading a e-book tends to be new life style with this era globalization. With looking at you can get a lot of information which will give you benefit in your life. With book everyone in this world could share their idea. Books can also inspire a lot of people. Many author can inspire their very own reader with their story or their experience. Not only situation that share in the ebooks. But also they write about the knowledge about something that you need case in point. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that you can get now. The authors in this world always try to improve their proficiency in writing, they also doing some study before they write to the book. One of them is this Building a Home Security System with Raspberry Pi.

Bruce Benedict:

Building a Home Security System with Raspberry Pi can be one of your basic books that are good idea. All of us recommend that straight away because this book has good vocabulary that can increase your knowledge in vocabulary, easy to understand, bit entertaining however delivering the information. The writer giving his/her effort to put every word into joy arrangement in writing Building a Home Security System with Raspberry Pi however doesn't forget the main stage, giving the reader the hottest in addition to based confirm resource data that maybe you can be one among it. This great information may drawn you into brand-new stage of crucial pondering.

Deborah Anderson:

Beside this kind of Building a Home Security System with Raspberry Pi in your phone, it can give you a way to get closer to the new knowledge or information. The information and the knowledge you can got here is fresh through the oven so don't always be worry if you feel like an outdated people live in narrow commune. It is good thing to have Building a Home Security System with Raspberry Pi because this book offers to you readable information. Do you oftentimes have book but you don't get what it's facts concerning. Oh come on, that will not end up to happen if you have this inside your hand. The Enjoyable agreement here cannot be questionable, like treasuring beautiful island. Techniques you still want to miss the idea? Find this book along with read it from currently!
