Pursuing Power and Light: Technology and Physics from James Watt to Albert Einstein (Johns Hopkins Introductory Studies in the History of Science) By Bruce J. Hunt

In the nineteenth century, science and technology developed a close and continuing relationship. The most important advancements in physics—the science of energy and the theory of the electromagnetic field—were deeply rooted in the new technologies of the steam engine, the telegraph, and electric power and light. Bruce J. Hunt here explores how the leading technologies of the industrial age helped reshape modern physics.

This period marked a watershed in how human beings exerted power over the world around them. Sweeping changes in manufacturing, transportation, and communications transformed the economy, society, and daily life in ways never before imagined. At the same time, physical scientists made great strides in the study of energy, atoms, and electromagnetism. Hunt shows how technology informed science and vice versa, examining the interaction between steam technology and the formulation of the laws of thermodynamics, for example, and that between telegraphy and the rise of electrical science.

Hunt's groundbreaking introduction to the history of physics points to the shift to atomic and quantum physics. It closes with a brief look at Albert Einstein's work at the Swiss patent office and the part it played in his formulation of relativity theory. Hunt translates his often-demanding material into engaging and accessible language suitable for undergraduate students of the history of science and technology.

Editorial Review

Users Review

From reader reviews:

Lisa Maurer:

Have you spare time for a day? What do you do when you have a lot more or little spare time? Yep, you can choose the suitable activity to get spend your time. Any person spent their particular spare time to take a stroll, shopping, or went to often the Mall. How about open as well as read a book entitled Pursuing Power and Light: Technology and Physics from James Watt to Albert Einstein (Johns Hopkins Introductory Studies in the History of Science)? Maybe it is to get best activity for you. You recognize beside you can spend your time with your favorite's book, you can better than before. Do you agree with their opinion or you have different opinion?

Ok Lord:

What do you about book? It is not important with you? Or just adding material when you really need something to explain what you problem? How about your free time? Or are you busy individual? If you don't have spare time to complete others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? Every person has many questions above. They need to answer that question since just their can do this. It said that about guide. Book is familiar on every person. Yes, it is correct. Because start from on pre-school until university need this particular Pursuing Power and Light: Technology and Physics from James Watt to Albert Einstein (Johns Hopkins Introductory Studies in the History of Science) to read.

Maxine Whitley:

You are able to spend your free time to study this book this book. This Pursuing Power and Light: Technology and Physics from James Watt to Albert Einstein (Johns Hopkins Introductory Studies in the History of Science) is simple to develop you can read it in the park, in the beach, train along with soon. If you did not include much space to bring the actual printed book, you can buy the actual e-book. It is make you simpler to read it. You can save the actual book in your smart phone. Consequently there are a lot of benefits that you will get when you buy this book.

Jesse Eriksen:

With this era which is the greater person or who has ability in doing something more are more valuable than other. Do you want to become one among it? It is just simple strategy to have that. What you must do is just

spending your time very little but quite enough to enjoy a look at some books. Among the books in the top checklist in your reading list is Pursuing Power and Light: Technology and Physics from James Watt to Albert Einstein (Johns Hopkins Introductory Studies in the History of Science). This book that is qualified as The Hungry Hills can get you closer in getting precious person. By looking right up and review this publication you can get many advantages.
