Climate Change: What Everyone Needs to Know? By Joseph Romm

Climate change will have a bigger impact on humanity than the Internet has had. The last decade's spate of superstorms, wildfires, heat waves, and droughts has accelerated the public discourse on this topic and lent credence to climatologist Lonnie Thomson's 2010 statement that climate change "represents a clear and present danger to civilization." In June 2015, the Pope declared that action on climate change is a moral issue.

This book offers the most up-to-date examination of climate change's foundational science, its implications for our future, and the core clean energy solutions. Alongside detailed but highly accessible descriptions of what is causing climate change, this entry in the *What Everyone Needs to Know* series answers questions about the practical implications of this growing force on our world:

- ? How will climate change impact you and your family in the coming decades?
- ? What are the future implications for owners of coastal property?
- ? Should you plan on retiring in South Florida or the U.S. Southwest or Southern Europe?
- ? What occupations and fields of study will be most in demand in a globally warmed world?
- ? What impact will climate change have on investments and the global economy?

As the world struggles to stem climate change and its effects, everyone will become a part of this story of the century. Here is what you need to know.

Editorial Review

Review

"Given the pressing need for action, *Climate Change* is the right book at the right time: accessible, comprehensive, unflinching, humane." --*The Daily Beast*

"*Climate Change, What Everyone Needs to Know* is a must-read for those who want to become climate literate and join the growing conversation about the greatest threat humanity faces today." --*The Guardian*

"Romm provides a useful primer on the drivers of climate change, the ways that the world might achieve that target, and the obstacles to moving away from business as usual... [the book] is full of useful information and accessible analysis." --*Foreign Affairs*

"An up-to-date, comprehensive examination of the science behind climate change, what these environmental issues mean for the future, and possible clean energy solutions." --*Mother Earth News*

About the Author

Joseph Romm, Ph.D., is one of the country's most influential communicators on climate science and solutions. Romm is Chief Science Advisor for "Years of Living Dangerously," which won the 2014 Emmy Award for Outstanding Nonfiction Series. He is the founding editor of Climate Progress, which New York Times columnist Tom Friedman called "the indispensable blog." In 2009, *Time* named him one of its "Heroes of the Environment," calling him "The Web's most influential climate-change blogger." In 2009, *Rolling Stone* put Romm on its list of 100 "people who are reinventing America." Romm was acting assistant secretary of energy in 1997, where he oversaw \$1 billion in low-carbon technology development and deployment. He is a Senior Fellow at American Progress and holds a Ph.D. in physics from MIT.

Users Review

From reader reviews:

Tiffany Serna:
