Hovercraft Technology, Economics and Applications (Studies in Mechanical Engineering) From North Holland

The amphibious versatility, marine speed and low footprint pressure have given the hovercraft a role in specialized applications. Among them are search and rescue, emergency medical services, military and arctic operations, icebreaking, patrol, law enforcement, ferries, and recreational activities such as racing. To meet these demands, the hovercraft has undergone considerable development since its inception.

A comprehensive and timely review of the analysis, design, operation, economics and applications of hovercraft is presented in this volume by a team of highly qualified experts. The topics covered range from first principles to the state-of-the-art, with extensive references to current literature. The overall presentation is intended not to exceed the final year level of undergraduate engineering. The introduction and summary sections of all chapters are intended to give a qualitative grasp of the material covered without having to read all the technical portions.

In varying degrees, the volume will appeal to managers, decision-support staff, operators, technologists, undergraduate students, and anyone entering the hovercraft field or seeking an introduction to it. It will also be of interest to design engineers, researchers and graduate students. Thus, this volume can serve as an up-to-date reference on several important aspects of hovercraft for a wide range of readers.

Editorial Review

Users Review

From reader reviews:

Ruth Cook:

Book is written, printed, or highlighted for everything. You can realize everything you want by a publication. Book has a different type. To be sure that book is important issue to bring us around the world. Beside that you can your reading proficiency was fluently. A guide Hovercraft Technology, Economics and Applications (Studies in Mechanical Engineering) will make you to always be smarter. You can feel far more confidence if you can know about every thing. But some of you think in which open or reading the book make you bored. It isn't make you fun. Why they could be thought like that? Have you seeking best book or suited book with you?

Edward Christensen:

The book with title Hovercraft Technology, Economics and Applications (Studies in Mechanical Engineering) has lot of information that you can discover it. You can get a lot of benefit after read this book. This kind of book exist new knowledge the information that exist in this reserve represented the condition of the world currently. That is important to yo7u to find out how the improvement of the world. This book will bring you inside new era of the internationalization. You can read the e-book on the smart phone, so you can read that anywhere you want.

Jacob King:

Is it an individual who having spare time then spend it whole day by watching television programs or just telling lies on the bed? Do you need something new? This Hovercraft Technology, Economics and Applications (Studies in Mechanical Engineering) can be the respond to, oh how comes? It's a book you know. You are so out of date, spending your free time by reading in this brand new era is common not a geek activity. So what these ebooks have than the others?

James Pickett:

Don't be worry in case you are afraid that this book will probably filled the space in your house, you will get it in e-book means, more simple and reachable. This particular Hovercraft Technology, Economics and Applications (Studies in Mechanical Engineering) can give you a lot of close friends because by you checking out this one book you have thing that they don't and make anyone more like an interesting person. This kind of book can be one of a step for you to get success. This e-book offer you information that possibly your friend doesn't recognize, by knowing more than some other make you to be great people. So , why

hesitate? Let's have Hovercraft Technology, Economics and Applications (Studies in Mechanical Engineering).
