Editorial Review

About the Author

Mark P. Zanna is a retired University Professor and former Chair of Psychology at the University of Waterloo. He received his BA ('66) and PhD ('70) from Yale University.

Professor Zanna's area of research is the psychology of attitudes. Primarily funded over the years by grants from the Social Sciences and Humanities Research Council of Canada, he has studied attitude structure and function, attitude formation and change, communication and persuasion (including the persistence of persuasion), and the attitude-behaviour relation. He has also conducted research on (a) overcoming resistance to persuasion, including research on subliminal priming and persuasion, self-affirmation and persuasion, and narrative persuasion, and (b) implicit attitudes (i.e., relatively automatic, intuitive evaluations), including research on aversive racists (i.e., those individuals who test low on thoughtful, conscious measures of prejudice, but high on more automatic, intuitive measures of prejudice) and defensive self-esteem (i.e., those individuals who test high on thoughtful, conscious measures of self-esteem, but low on more automatic, intuitive measures of self-esteem). In the domain of health promotion, he has evaluated a 'safer sex' intervention and tested the subtle effects (e.g., on implicit norms) of movie stars' smoking in feature films. Currently, he is investigating the causes and consequences of negative implicit norms toward females in STEM disciplines. A winner of several career awards for distinguished scientific contribution (D. O. Hebb Award, Canadian Psychological Association, 1993; D. T. Campbell Award, Society of Personality and Social Psychology, 1997; Fellow, Royal Society of Canada, 1999; Inaugural Excellence in Research Award, UW, 2000; Inaugural Distinguished University Professor, UW, 2004; Inaugural Excellence in Graduate Supervision, UW, 2005; Distinguished Scientist Award, Society of Experimental Social Psychology, 2007; K. Lewin Award, Society for the Psychological Study of Social Issues, 2010; Killam Prize Laureate, Canada Council for the Arts, 2011), Professor Zanna has been a consulting editor of the top four journals in social/personality psychology (Journal of Personality and Social Psychology, Journal of Experimental Social Psychology, Personality and Social Psychology Bulletin, and Journal of Personality) plus 7 other journals. Currently, he co-edits the Ontario Symposium on Personality and Social Psychology (since 1981) and the Advances in Experimental Social Psychology (since 1991), the two major edited book series in social psychology. He has also been elected to the presidencies of the two major learned societies in social psychology, the Society of Experimental Social Psychology (1985) and the Society of Personality and Social Psychology (1997). 32 (of 34) of Professor Zanna's doctoral or postdoctoral students have taken academic positions. Six students chaired their respective departments (plus one was the President of a small US college) and 12 others became editors (or consulting editors) of major journals in the field. According to the Web of Science, Professor Zanna's lifetime citations now (February, 2014) exceed 9,500 ($h = 50$; $H = 55$). According to Google Scholar, lifetime citations now (February, 2014) exceed 21,200 ($h = 74$). Finally, Professor Zanna has ranked 12th and 20th worldwide in citations in social psychology textbooks and social psychology handbooks, respectively.

Users Review

From reader reviews:

German Montoya:

This book untitled *Advances in Experimental Social Psychology: 42* to be one of several books that best seller in this year, here is because when you read this e-book you can get a lot of benefit upon it. You will easily to buy this particular book in the book retail store or you can order it via online. The publisher with this book sells the e-book too. It makes you more easily to read this book, as you can read this book in your Smartphone. So there is no reason for your requirements to past this reserve from your list.

Robert Auclair:

The book untitled *Advances in Experimental Social Psychology: 42* contain a lot of information on it. The writer explains her idea with easy approach. The language is very clear and understandable all the people, so do not worry, you can easy to read the item. The book was published by famous author. The author will bring you in the new period of time of literary works. You can read this book because you can keep reading your smart phone, or gadget, so you can read the book within anywhere and anytime. If you want to buy the e-book, you can start their official web-site along with order it. Have a nice study.

Steven Simon:

Is it you who having spare time after that spend it whole day through watching television programs or just telling lies on the bed? Do you need something new? This *Advances in Experimental Social Psychology: 42* can be the solution, oh how comes? The new book you know. You are consequently out of date, spending your spare time by reading in this fresh era is common not a nerd activity. So what these books have than the others?

Joseph Mack:

As a student exactly feel bored for you to reading. If their teacher expected them to go to the library or make summary for some reserve, they are complained. Just tiny students that has reading's internal or real their leisure activity. They just do what the trainer want, like asked to go to the library. They go to right now there but nothing reading seriously. Any students feel that examining is not important, boring and also can't see colorful photos on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. So , this *Advances in Experimental Social Psychology: 42* can make you feel more interested to read.
