Digital Image Processing: An Algorithmic Approach with MATLAB (Chapman & Hall/CRC Textbooks in Computing) By Uvais Qidwai, C.H. Chen

Avoiding heavy mathematics and lengthy programming details, **Digital Image Processing: An Algorithmic Approach with MATLAB®** presents an easy methodology for learning the fundamentals of image processing. The book applies the algorithms using MATLAB®, without bogging down students with syntactical and debugging issues.

One chapter can typically be completed per week, with each chapter divided into three sections. The first section presents theoretical topics in a very simple and basic style with generic language and mathematics. The second section explains the theoretical concepts using flowcharts to streamline the concepts and to form a foundation for students to code in any programming language. The final section supplies MATLAB codes for reproducing the figures presented in the chapter. Programming-based exercises at the end of each chapter facilitate the learning of underlying concepts through practice.

This textbook equips undergraduate students in computer engineering and science with an essential understanding of digital image processing. It will also help them comprehend more advanced topics and sophisticated mathematical material in later courses. A color insert is included in the text while various instructor resources are available on the author's website.

Digital Image Processing: An Algorithmic Approach with MATLAB (Chapman & Hall/CRC Textbooks in Computing) By Uvais Qidwai, C.H. Chen **Bibliography**

- Sales Rank: #4007697 in Books
- Brand: Brand: Chapman and Hall/CRC
- Published on: 2009-10-15
- Original language: English
- Number of items: 1
- Dimensions: 9.30" h x .80" w x 6.20" l, 1.30 pounds
- Binding: Hardcover
- 314 pages

Editorial Review

About the Author

Uvais Qidwai is an assistant professor in the computer science and engineering department at Qatar University in Doha.

C.H. Chen is chancellor professor in electrical and computer engineering at the University of Massachusetts in North Dartmouth.

Users Review

From reader reviews:

Dawn Williams:

Do you have favorite book? For those who have, what is your favorite's book? Book is very important thing for us to know everything in the world. Each reserve has different aim or maybe goal; it means that book has different type. Some people feel enjoy to spend their time for you to read a book. They can be reading whatever they have because their hobby is actually reading a book. Think about the person who don't like examining a book? Sometime, particular person feel need book once they found difficult problem or even exercise. Well, probably you will need this Digital Image Processing: An Algorithmic Approach with MATLAB (Chapman & Hall/CRC Textbooks in Computing).

Norma Lorentzen:

Book is definitely written, printed, or illustrated for everything. You can recognize everything you want by a book. Book has a different type. We all know that that book is important factor to bring us around the world. Beside that you can your reading proficiency was fluently. A reserve Digital Image Processing: An Algorithmic Approach with MATLAB (Chapman & Hall/CRC Textbooks in Computing) will make you to always be smarter. You can feel much more confidence if you can know about every little thing. But some of you think that open or reading any book make you bored. It's not make you fun. Why they are often thought like that? Have you searching for best book or suitable book with you?

Robert Polk:

Now a day individuals who Living in the era exactly where everything reachable by connect with the internet and the resources inside can be true or not need people to be aware of each info they get. How individuals to be smart in having any information nowadays? Of course the correct answer is reading a book. Studying a book can help folks out of this uncertainty Information particularly this Digital Image Processing: An Algorithmic Approach with MATLAB (Chapman & Hall/CRC Textbooks in Computing) book as this book offers you rich data and knowledge. Of course the data in this book hundred per cent guarantees there is no doubt in it you probably know this.

Faye Pearson:

What is your hobby? Have you heard this question when you got students? We believe that that issue was given by teacher to their students. Many kinds of hobby, Every person has different hobby. And you also know that little person including reading or as examining become their hobby. You have to know that reading is very important in addition to book as to be the point. Book is important thing to provide you knowledge, except your personal teacher or lecturer. You find good news or update regarding something by book. Different categories of books that can you decide to try be your object. One of them are these claims Digital Image Processing: An Algorithmic Approach with MATLAB (Chapman & Hall/CRC Textbooks in Computing).
