The Nurse Leader Handbook: The Art and Science of Nurse Leadership By Studer Group

Imagine what it's like to be a nurse leader. (Actually, many of you reading this don't have to imagine!) You're caring for patients - a tough job in and of itself - and you're expected to keep doing that and manage a staff of others like you. In many organizations, nurse leaders get only a classroom course and a one- or two-week training period to help them make the transition.

The Nurse Leader Handbook: The Art and Science of Nurse Leadership helps "fill in the knowledge gaps" for the courageous and dedicated men and women who take on one of the most complex jobs in healthcare.

This book provides nurse leaders with a solid foundation for success. It also serves as a reference they can revisit again and again when they have questions or need a quick refresher course in a particular area of the job. Readers will learn how to:

Reward and recognize positive behaviors to reinforce them and inspire them in others

Hold crucial conversations with high, middle, and low performers

Use Key Words/AIDET® to drive quality outcomes and build patient loyalty

Teach and implement service recovery so that it becomes second nature for a team

Create a culture where Never Events never happen

Answer tough questions in a way that creates a sense of unity, not divisiveness

Talk to the C-Suite in a way that gets results

Walk the work/life blend tightrope without falling off (and taking others down with you!)

Ultimately, being a great nurse leader is all about making the staff's job easier so that they can provide exceptional patient care. That's what all nurses at all levels care about most - and it's a truth that's interwoven throughout this informative and inspiring book. *The Nurse Leader Handbook* is an anthology whose chapters are written by a variety of Studer Group coaches, nurse leaders and physician leaders from across America.
