**Aircraft Communications and Navigation Systems** By David Wyatt, Mike Tooley

Butterworth-Heinemann's Aircraft Engineering Principles and Practice Series provides students, apprentices and practicing aerospace professionals with the definitive resources to advance their aircraft engineering maintenance studies and career.

This book provides an introduction to the principles of communications and navigation systems. It is written for anyone pursuing a career in aircraft maintenance engineering or a related aerospace engineering discipline, and in particular will be suitable for those studying for licensed aircraft maintenance engineer status. The book systematically addresses the relevant sections (ATA chapters 23/34) of modules 11 and 13 of part-66 of the EASA syllabus. It is ideal for anyone studying as part of an EASA and FAR-147 approved course in aerospace engineering.

## **Editorial Review**

From the Back Cover

Butterworth-Heinemann's Aircraft Engineering Principles and Practice Series provides students, apprentices and practicing aerospace professionals with the definitive resources to advance your aircraft engineering maintenance studies and career.

This book provides an introduction to the principles of aircraft communications and navigation systems. It is written for anyone pursuing a career in aircraft maintenance engineering or a related aerospace engineering discipline, and in particular will be suitable for those studying for licensed aircraft maintenance engineer status. The book systematically outlines modules 11 and 13 Part-66 of the EASA syllabus. It is ideal for anyone studying as part of a EASA and FAR-147 approved course in aerospace engineering.

- .The perfect blend of academic and practical information for aircraft engineering maintenance
- .Delivers the essential principles and knowledge needed by Aircraft Certifying Mechanics, Technicians and Engineers for Part-66 qualification
- .Comprehensive and accessible, with self-test questions, exercises and multiple choice questions to enhance learning for both independent and tutor-assisted study

All the necessary mathematical, electrical and electronic principles are examined clearly and in-depth, meeting the requirements of Part-66 modules, Aerospace Engineering City and Guilds modules, EDEXCEL National Units, elements of EDEXCEL Higher National Units, and a Foundation Degree in aircraft maintenance engineering or a related discipline.

### **About the Author**

Mike Tooley is a technical author and consultant. He was formerly Vice Principal at Brooklands College in Surrey, England, where he was responsible for the delivery of learning to over 10,000 Further and Higher Education students increasingly by flexible, open and on-line distance learning. Mike is the well-known author of several popular engineering and related text books, including widely adopted course texts for BTEC, GCE A-level and GCSE qualifications in Engineering. Mike's hobbies include astronomy, amateur radio, aviation, computing and electronic circuit design and construction.

## **Users Review**

### **From reader reviews:**

#### **Brandon Harmon:**

The ability that you get from Aircraft Communications and Navigation Systems will be the more deep you rooting the information that hide into the words the more you get interested in reading it. It doesn't mean that this book is hard to recognise but Aircraft Communications and Navigation Systems giving you buzz feeling of reading. The article writer conveys their point in certain way that can be understood simply by anyone who read that because the author of this reserve is well-known enough. That book also makes your current vocabulary increase well. That makes it easy to understand then can go with you, both in printed or e-book style are available. We propose you for having this specific Aircraft Communications and Navigation

Systems instantly.

**Norma Dickerson:**

This Aircraft Communications and Navigation Systems are reliable for you who want to certainly be a successful person, why. The explanation of this Aircraft Communications and Navigation Systems can be on the list of great books you must have is usually giving you more than just simple examining food but feed a person with information that possibly will shock your previous knowledge. This book will be handy, you can bring it almost everywhere and whenever your conditions in the e-book and printed versions. Beside that this Aircraft Communications and Navigation Systems giving you an enormous of experience for instance rich vocabulary, giving you demo of critical thinking that we realize it useful in your day activity. So , let's have it and revel in reading.

**Mindy Hicks:**

Hey guys, do you would like to finds a new book to learn? May be the book with the concept Aircraft Communications and Navigation Systems suitable to you? Typically the book was written by famous writer in this era. Typically the book untitled Aircraft Communications and Navigation Systems is one of several books in which everyone read now. This particular book was inspired a number of people in the world. When you read this e-book you will enter the new shape that you ever know before. The author explained their strategy in the simple way, consequently all of people can easily to understand the core of this e-book. This book will give you a lots of information about this world now. So you can see the represented of the world with this book.

**Anne Young:**

The publication with title Aircraft Communications and Navigation Systems possesses a lot of information that you can find out it. You can get a lot of benefit after read this book. This specific book exist new know-how the information that exist in this publication represented the condition of the world right now. That is important to yo7u to know how the improvement of the world. This particular book will bring you inside new era of the globalization. You can read the e-book on the smart phone, so you can read the idea anywhere you want.
