An Introduction to Natural Language Processing Through Prolog (Learning about Language) By Clive Matthews

Research into Natural Language Processing - the use of computers to process language - has developed over the last couple of decades into one of the most vigorous and interesting areas of current work on language and communication. This book introduces the subject through the discussion and development of various computer programs which illustrate some of the basic concepts and techniques in the field. The programming language used is Prolog, which is especially well-suited for Natural Language Processing and those with little or no background in computing.

Following the general introduction, the first section of the book presents Prolog, and the following chapters illustrate how various Natural Language Processing programs may be written using this programming language. Since it is assumed that the reader has no previous experience in programming, great care is taken to provide a simple yet comprehensive introduction to Prolog. Due to the 'user friendly' nature of Prolog, simple yet effective programs may be written from an early stage. The reader is gradually introduced to various techniques for syntactic processing, ranging from Finite State Network recognisers to Chart parsers. An integral element of the book is the comprehensive set of exercises included in each chapter as a means of cementing the reader's understanding of each topic. Suggested answers are also provided.

An Introduction to Natural Language Processing Through Prolog is an excellent introduction to the subject for students of linguistics and computer science, and will be especially useful for those with no background in the subject.

Editorial Review

About the Author

Clive Matthews is a lecturer in Linguistics at the University of East Anglia.

Users Review

From reader reviews:

Mary Burnette:

As people who live in the modest era should be up-date about what going on or facts even knowledge to make them keep up with the era that is certainly always change and progress. Some of you maybe may update themselves by reading books. It is a good choice to suit your needs but the problems coming to anyone is you don't know what kind you should start with. This An Introduction to Natural Language Processing Through Prolog (Learning about Language) is our recommendation to make you keep up with the world. Why, because book serves what you want and wish in this era.

Christopher Barry:

Reading a publication tends to be new life style in this era globalization. With reading through you can get a lot of information that could give you benefit in your life. Having book everyone in this world can share their idea. Publications can also inspire a lot of people. A lot of author can inspire their reader with their story or even their experience. Not only the storyline that share in the books. But also they write about the data about something that you need example of this. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that exist now. The authors on this planet always try to improve their skill in writing, they also doing some exploration before they write with their book. One of them is this An Introduction to Natural Language Processing Through Prolog (Learning about Language).

Barry Whitfield:

Do you have something that that suits you such as book? The publication lovers usually prefer to pick book like comic, quick story and the biggest an example may be novel. Now, why not trying An Introduction to Natural Language Processing Through Prolog (Learning about Language) that give your satisfaction preference will be satisfied through reading this book. Reading routine all over the world can be said as the opportunity for people to know world far better then how they react to the world. It can't be mentioned constantly that reading habit only for the geeky particular person but for all of you who wants to end up being success person. So , for all of you who want to start studying as your good habit, it is possible to pick An Introduction to Natural Language Processing Through Prolog (Learning about Language) become your own personal starter.

Charles Gray:

Reading a e-book make you to get more knowledge as a result. You can take knowledge and information from the book. Book is composed or printed or descriptive from each source which filled update of news. On this modern era like now, many ways to get information are available for a person. From media social including newspaper, magazines, science reserve, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Ready to spend your spare time to open your book? Or just trying to find the An Introduction to Natural Language Processing Through Prolog (Learning about Language) when you needed it?
