Modern Construction: Lean Project Delivery and Integrated Practices (Industrial Innovation Series) By Lincoln H. Forbes, Syed M. Ahmed

During the past several decades, the manufacturing and service industries significantly increased their levels of productivity, quality, and profitability through the application of process improvement techniques and information technology. Unfortunately, the construction industry lags far behind in the application of performance improvement and optimization techniques, as well as its overall competitiveness. Written by Lincoln H. Forbes and Syed M. Ahmed, both highly regarded for leadership and innovation, **Modern Construction: Lean Project Delivery and Integrated Practices** offers cutting-edge lean tools and other productive strategies for the management of people and processes in the construction industry.

Drs. Forbes and Ahmed focus mainly on lean construction methodologies, such as The Last Planner(R) System, The Lean Project Delivery System (TM), and Integrated Project Delivery(TM). The tools and strategies offered draw on the success of the world-renowned Toyota Production System (TPS) adapted to the construction environment by construction professionals and researchers involved in developing and advocating lean construction methods. The book also discusses why true lean construction can best occur when all the construction stakeholders, owners, designers, constructors, and material suppliers are committed to the concept of optimizing the flow of activities holistically while de-emphasizing their self-interest.

The authors also reintroduce process improvement approaches such as TQM and Six Sigma as a foundation for the adoption of lean methodologies, and demonstrate how these methods can improve projects in a so-called traditional environment. The book integrates these methods with emerging interest in "green construction" and the use of information technology and Building Information Modeling (BIM), while recognizing the human element in relation to motivation, safety, and environmental stresses. Written specifically for professionals in an industry that desperately needs to play catch up, the book delineates cutting-edge

approaches with the benefit of successful cases and explains how their deployment can improve construction performance and competitiveness.

Editorial Review

Review

"... collects lean ideas in one place. clarifies their application in the construction industry and helps to promote their adoption. ... balances theoretical explanations with discussions of actual cases where practitioners successfully applies lean innovation. ... thoroughly documents the human element important for success."

-- *Industrial Engineer's* book of the month May 2011

About the Author

College of Engineering, Florida International University, Miami, USA. (Adjunct) Department of Construction Management, East Carolina University, USA (chair)

Users Review

From reader reviews:

Lidia Hill:

Book is to be different per grade. Book for children until adult are different content. We all know that that book is very important normally. The book Modern Construction: Lean Project Delivery and Integrated Practices (Industrial Innovation Series) had been making you to know about other information and of course you can take more information. It is rather advantages for you. The book Modern Construction: Lean Project Delivery and Integrated Practices (Industrial Innovation Series) is not only giving you more new information but also to be your friend when you truly feel bored. You can spend your own personal spend time to read your book. Try to make relationship while using book Modern Construction: Lean Project Delivery and Integrated Practices (Industrial Innovation Series). You never sense lose out for everything when you read some books.

Shawn Farr:

That book can make you to feel relax. This kind of book Modern Construction: Lean Project Delivery and Integrated Practices (Industrial Innovation Series) was multi-colored and of course has pictures on there. As we know that book Modern Construction: Lean Project Delivery and Integrated Practices (Industrial Innovation Series) has many kinds or style. Start from kids until youngsters. For example Naruto or Detective Conan you can read and believe you are the character on there. Therefore not at all of book usually are make you bored, any it can make you feel happy, fun and rest. Try to choose the best book for you personally and try to like reading which.

Mary Blackwell:

As a college student exactly feel bored in order to reading. If their teacher inquired them to go to the library or even make summary for some guide, they are complained. Just very little students that has reading's soul or real their pastime. They just do what the teacher want, like asked to go to the library. They go to generally there but nothing reading critically. Any students feel that reading through is not important, boring in addition to can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore this Modern Construction: Lean Project Delivery and Integrated Practices (Industrial Innovation Series) can make you really feel more interested to read.

Bessie Starns:

Reading a publication make you to get more knowledge from this. You can take knowledge and information coming from a book. Book is written or printed or highlighted from each source which filled update of news. On this modern era like today, many ways to get information are available for you actually. From media social such as newspaper, magazines, science reserve, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to spread out your book? Or just seeking the Modern Construction: Lean Project Delivery and Integrated Practices (Industrial Innovation Series) when you desired it?
