Red Hat Fedora and Enterprise Linux 4 Bible By Christopher Negus

For desktop or business, here's all the Linux you need

Whether you want the latest Linux software in Fedora or a stable Red Hat Enterprise Linux for your business, this book covers it all. Install Fedora Core 4 from the DVD or two CDs included and learn to use Linux as a desktop system or an Internet server. Check out fun applications for surfing the Web and doing office tasks. Learn to manage basic system administration, and move up to running your own Web, mail, print, or file server.

Configure Fedora or Red Hat Enterprise Linux to:

- Browse the Web with Firefox
- Read and send e-mail with Evolution
- Create documents, spreadsheets, or presentations with OpenOffice.org
- Set up networked Web, mail, file, database, LDAP, print, or other servers

Transition your Fedora skills to Enterprise Linux with:

- Descriptions of RHEL products, features, and services
- Pointers to professional RHEL training and certification

Install complete Fedora Core 4 from DVD

Using the bonus DVD, you can:

- Boot the DVD to check and prepare your computer before installing Fedora (using KNOPPIX)
- Install the complete Fedora Core 4 Linux operating system (all source code packages included)

Install desktop Fedora Core 4 from CD

Using the bonus 2-CD set, you can:

- Select the software you need for a well-stocked desktop system
- Add key server features to use with your desktop Fedora system

Open for more!

- Find ten cool things you can do with Fedora
- Use KNOPPIX to test and prepare your computer
- Get your Windows stuff working in Linux

Editorial Review

From the Inside Flap

Ten cool things to do with Fedora

1. Add tons of free software
2. Change themes, backgrounds, and other preferences of your GNOME or KDE desktops
3. Import, play, and manage your entire music collection in Rhythmbox
4. Enjoy instant messaging
5. Download, modify, and share pictures with friends
6. Watch television
7. Use wired, wireless, or modem connections to reach the Web or other computers
8. Run many of the most popular Windows applications using WINE
9. Back up your data files quickly and easily
10. Share files and printers on your Windows network using Samba

Add Linux to your Windows PC

- Resize your hard disk to make space for Linux
- Install Linux to dual boot with Windows
- Mount Windows file systems to work from Linux
- Do Windows file and print sharing in Linux with Samba
- Access your Windows documents, music, presentations, Web pages, and video from Linux

Use KNOPPIX to test and prepare your computer

Before you install Fedora, use the DVD with this book to:

- Check to see whether Linux will work on your computer
- Prepare your computer to dual boot Fedora and Windows

Boot the DVD and type knoppix at the boot prompt. When KNOPPIX comes up, look on the back of this page to see all the things you can do before installing Fedora Core 4!

About the Author

Christopher Negus has been working with UNIX systems, the Internet, and (most recently) Linux systems for more than two decades. During that time, Chris worked at AT&T Bell Laboratories, UNIX System Laboratories, and Novell, helping to develop the UNIX operating system. Features from many of the UNIX projects Chris worked on at AT&T have found their way into Red Hat Enterprise Linux, Fedora, and other Linux systems.

Chris is the author of all editions of *Red Hat Linux Bible*, which because of the name changes of Red Hat's Linux projects has evolved into the book you are holding. Most recently, Chris wrote *Linux Bible 2005 Edition* and co-wrote *Linux Troubleshooting Bible* and *Linux Toys* for Wiley Publishing. During the past few years, Chris has written several books on UNIX and the Internet, including *Internet Explorer 4 Bible* and *Netscape Plug-Ins For Dummies* for Wiley Publishing. He also co-wrote several books for Que Publishing, including *The Complete Idiot's Guide to Networking* (second and third editions) and *Using UNIX* (second edition).

Users Review

From reader reviews:

Joyce Greenberg:

What do you consider book? It is just for students because they are still students or the idea for all people in

the world, what best subject for that? Just you can be answered for that concern above. Every person has distinct personality and hobby for each and every other. Don't to be compelled someone or something that they don't wish do that. You must know how great and important the book Red Hat Fedora and Enterprise Linux 4 Bible. All type of book can you see on many solutions. You can look for the internet sources or other social media.

Edward McClung:

Book is to be different for every grade. Book for children until eventually adult are different content. As we know that book is very important for all of us. The book Red Hat Fedora and Enterprise Linux 4 Bible has been making you to know about other knowledge and of course you can take more information. It is quite advantages for you. The guide Red Hat Fedora and Enterprise Linux 4 Bible is not only giving you much more new information but also to get your friend when you truly feel bored. You can spend your personal spend time to read your reserve. Try to make relationship while using book Red Hat Fedora and Enterprise Linux 4 Bible. You never truly feel lose out for everything when you read some books.

Alta Favors:

Reading a e-book can be one of a lot of exercise that everyone in the world loves. Do you like reading book therefore. There are a lot of reasons why people enjoyed. First reading a publication will give you a lot of new facts. When you read a guide you will get new information since book is one of numerous ways to share the information or perhaps their idea. Second, examining a book will make anyone more imaginative. When you reading through a book especially fiction book the author will bring you to definitely imagine the story how the figures do it anything. Third, you are able to share your knowledge to other people. When you read this Red Hat Fedora and Enterprise Linux 4 Bible, you could tells your family, friends in addition to soon about yours reserve. Your knowledge can inspire the others, make them reading a reserve.

Sandra Black:

Playing with family inside a park, coming to see the ocean world or hanging out with pals is thing that usually you could have done when you have spare time, in that case why you don't try factor that really opposite from that. 1 activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love Red Hat Fedora and Enterprise Linux 4 Bible, you could enjoy both. It is great combination right, you still need to miss it? What kind of hang-out type is it? Oh seriously its mind hangout men. What? Still don't understand it, oh come on its identified as reading friends.
