The Practice of Statistics in the Life Sciences, Third Edition By Brigitte Baldi, David S. Moore

This remarkably engaging textbook gives biology students an introduction to statistical practice all their own. It covers essential statistical topics with examples and exercises drawn from across the life sciences, including the fields of nursing, public health, and allied health. Based on David Moore's The Basic Practice of Statistics, PSLS mirrors that #1 bestseller's signature emphasis on statistical thinking, real data, and what statisticians actually do. The new edition includes new and updated exercises, examples, and samples of real data, as well as an expanded range of media tools for students and instructors.

Editorial Review

About the Author

Brigitte Baldi is a graduate of France's Ecole Normale Supérieure in Paris, France. In her academic studies, she combined a love of math and quantitative analysis with wide interests in the life sciences. She studied math and biology in a double major and obtained a Masters in molecular biology and biochemistry and a Masters in cognitive sciences. She earned her Ph.D. in neuroscience from the Université Paris VI studying multisensory integration in the brain and used computer simulations to study patterns of brain reorganization after lesion as a post-doctoral fellow at the California Institute of Technology. She then worked as a management consultant advising corporations before returning to academia to teach statistics. Dr. Baldi is currently a lecturer in the Department of Statistics at the University of California, Irvine. She is actively involved in statistical education. She was a local and later national advisor in the development of the statistics telecourse *Statistically Speaking*, replacing David Moore's earlier telecourse *Against All Odds*. She developed UCI's first online statistics courses and is interested in ways to integrate new technologies in the classroom to enhance participation and learning. She is currently serving as an elected member to the Executive Committee At Large of the section on Statistical Education of the American Statistical Association. David S. Moore is Shanti S. Gupta Distinguished Professor of Statistics, Emeritus, at Purdue University, USA, and was 1998 president of the American Statistical Association. He received his AB from Princeton and his PhD from Cornell, both in mathematics. He has written many research papers in statistical theory and served on the editorial boards of several major journals. Professor Moore is an elected fellow of the American Statistical Association and of the Institute of Mathematical Statistics and an elected member of the International Statistical Institute. He has served as program director for statistics and probability at the National Science Foundation. In recent years, Professor Moore has devoted his attention to the teaching of statistics. He was the content developer for the Annenberg/Corporation for Public Broadcasting college-level telecourse *Against All Odds: Inside Statistics* and for the series of video modules *Statistics: Decisions through Data*, intended to aid the teaching of statistics in schools. He is the author of influential articles on statistics education and of several leading texts. Professor Moore has served as president of the International Association for Statistical Education and has received the Mathematical Association of America's national award for distinguished college or university teaching of mathematics.

Users Review

From reader reviews:

Enrique Flora:

Information is provisions for folks to get better life, information these days can get by anyone at everywhere. The information can be a know-how or any news even restricted. What people must be consider if those information which is in the former life are challenging to be find than now is taking seriously which one would work to believe or which one often the resource are convinced. If you get the unstable resource then you obtain it as your main information we will see huge disadvantage for you. All of those possibilities will not happen inside you if you take *The Practice of Statistics in the Life Sciences, Third Edition* as your daily resource information.

Sara Burns:

Your reading 6th sense will not betray a person, why because this The Practice of Statistics in the Life Sciences, Third Edition publication written by well-known writer whose to say well how to make book that can be understand by anyone who all read the book. Written with good manner for you, dripping every ideas and composing skill only for eliminate your hunger then you still question The Practice of Statistics in the Life Sciences, Third Edition as good book not just by the cover but also through the content. This is one book that can break don't judge book by its protect, so do you still needing another sixth sense to pick this kind of!? Oh come on your examining sixth sense already told you so why you have to listening to another sixth sense.

Bernice Mignone:

This The Practice of Statistics in the Life Sciences, Third Edition is new way for you who has attention to look for some information mainly because it relief your hunger of information. Getting deeper you in it getting knowledge more you know or perhaps you who still having little bit of digest in reading this The Practice of Statistics in the Life Sciences, Third Edition can be the light food in your case because the information inside this particular book is easy to get through anyone. These books acquire itself in the form that is reachable by anyone, yes I mean in the e-book web form. People who think that in reserve form make them feel tired even dizzy this guide is the answer. So you cannot find any in reading a e-book especially this one. You can find what you are looking for. It should be here for an individual. So , don't miss the item! Just read this e-book sort for your better life as well as knowledge.

Bonnie Parker:

As we know that book is important thing to add our information for everything. By a publication we can know everything we want. A book is a group of written, printed, illustrated as well as blank sheet. Every year was exactly added. This e-book The Practice of Statistics in the Life Sciences, Third Edition was filled about science. Spend your time to add your knowledge about your scientific disciplines competence. Some people has various feel when they reading a new book. If you know how big good thing about a book, you can sense enjoy to read a guide. In the modern era like now, many ways to get book that you just wanted.
